

**ABSTRACT**

Antisense compounds, compositions and methods are  
5 provided for modulating the expression of superoxide  
dismutase 1, soluble. The compositions comprise antisense  
compounds, particularly antisense oligonucleotides, targeted  
to nucleic acids encoding superoxide dismutase 1, soluble.  
Methods of using these compounds for modulation of superoxide  
10 dismutase 1, soluble expression and for treatment of diseases  
associated with expression of superoxide dismutase 1, soluble  
are provided.
